

Caring for Life

Access to health care services is fundamental to productivity, well being and development of society. Since beginning NEEPCO is making modest but sincere efforts to fill-up the deficits in access to primary healthcare and basic healthcare facilities in the neighbourhood of its project sites. The interventions include,

- Upgradation of PHC/CHC/Civil Hospitals etc. by infrastructure construction and providing apparatus
- Donation of Ambulance
- Cleft lip surgery
- Medical Camp
- Awareness programme on Diabetes and Cancer
- Construction of waste bins, community toilets, drinking water etc.

Ambulance Testimonials

Ambulance provided for emergency health care services to three villages particularly Saipum, Saiphai, and Mauchar, Kolasib, Mizoram covering more than 4000 population of the area. The Chairman of the Village Health Committee, Saipum, expressed that it is an important intervention by NEEPCO for remotely located village like Saipum. Earlier we had to rely on ambulance service from the district head quarter and the response time was very high due to bad road condition. Now we have our own ambulance in place for quick and efficient response during emergency.”

The intervention primarily aims at providing access to services and facilities in terms of direct healthcare, awareness, drinking water and sanitation. It is expected that the intervention would result in improved access and create awareness. This would consequently result in improved outcome in terms of coverage and enhanced awareness.

MEDICAL Health Care

Operation Smile

NEEPCO conducted cleft lip surgery in association with operation smile, Guwahati for 120 nos. of cleft lip patient from Meghalaya

Ibakoidor's story

“Ibakoidor was afraid to meet people, but now she loves to make friends. People used to treat her differently. That made us to believe that she was a cursed baby. After her surgery, she looks like everyone else and has many new friends,” said Forester Sokkslet, father of Ibakoidor Bamon, a 15 years old girl from Nongsder village of Meghalaya.

“Thanks to NEEPCO for our Smiles”

Health Camp

Reaching out the unreached:

Health checkup through health camps is a major concern of the corporation for the local people residing near by its area of operation. Number of health camps were organised at Assam, Tripura, Nagaland, Mizoram and Arunachal Pradesh and medicine were distributed to the needy villagers.

The selected remote villages have very little or zero access to health services and therefore, the health camps organised by the respective project sites of NEEPCO arrested huge public applauds.
