NEEPCO Fights COVID-19 Pandemic

Our top priority is to make our spaces sanitized, safe and bacteria and virus free. With the threat of COVID-19 looming, we ensure that every space and surface are cleaned and sanitized so as to guarantee the safety and health of all our employees.

As precautionary measures, thermal scanning is regularly conducted in all projects and locations.

We also continue to reach out to the communities around by providing relief, in the form of essential food items, medical assistance and monitoring and PPEs.
