

Rural Development/ Other Backward area development:

The Corporate Social Responsibility initiatives for rural development are of great significance. The basic aim of the rural development/ Other Backward area development is the economic betterment of the people as well as greater social transformation of the people living in the backward areas. The CSR agenda of NEEPCO for rural development is to reduce inequality and thus to achieve community development.

In the last five years, NEEPCO has spent around 20% of its CSR budget on rural area development which includes Construction of roads, foot bridges, water harvesting schemes, construction of embankment and fencing, waiting sheds, toilets, installation of solar light, electrification works, development of community halls etc.

Photographs of some of initiatives under taken under Rural Development / Other Backward area development are given below:

Construction of MUP Building at North Hlimen Village, Mizoram.
